
Tre Tau Engineering Srl
Strada Signagatta, 41
Pianezza (TO), 10044 – Italia

Full-stack developer

Tau Group is a technology company working at the heart of the energy transition, committed to decarbonising energy and electrifying transport options. Its patented technologies combine the need for sustainable, resource-efficient production with the power, reliability and performance required by electric vehicles and machinery. This makes it possible to manufacture smaller, more durable, more environmentally-friendly and more powerful motors, transformers and generators. Tau Group's focus is on protective coatings for high-performance copper, aluminium, and steel wires with a low environmental impact.

The Person

We are looking for a motivated and experienced individual to join our full-stack development team, assisting in the design and development of innovative software applications.

Main Responsibilities:

- Collaborate with the development team to design, develop, and maintain software applications
- Write efficient, tested, and well-documented code
- Develop scalable, high-performance, and secure solutions
- Work with relational databases such as MySQL and Microsoft SQL Server to manage data
- Contribute to the design and implementation of cloud-based solutions, especially using Azure for IoT applications

Key features

- Experience in software development using programming languages such as C#, Java, Python
- Knowledge of SCL (Structured Control Language) and KOP (Konnex-Programming) for industrial automation programming
- Experience with relational databases, particularly MySQL and Microsoft SQL Server
- Familiarity with using Azure for IoT and cloud computing solutions
- Strong understanding of software design principles and development best practices
- Ability to work collaboratively within a team and communicate effectively

Are you ready to develop advanced solutions to support automotive and energy industries across their challenges? Please, send your CV to recruitment@tau.group
