

Job Opportunities

Junior Logistics Manager

The Company

Tau is a technology company at the core of the electrification of transport and the decarbonization of energy.

Our climate technologies reconcile the necessity of sustainable manufacturing with the power, reliability and performance that e-mobility requires to enable smaller, greener and more powerful motors. Today, our technologies help our customers reach their full potential without unnecessary waste of resources.

Tau's protective coatings produce winding wire with superior dielectric, mechanical and chemical properties, while optimizing production processes of copper and steel wire for environmental friendliness with smart quality controls, predictive analytics and peace-of-mind operating simplicity.

The Person

We're looking for a **Junior Logistics Manager.**

Main responsibilities

- Manage the flows of incoming and outgoing goods with related entries in the management system;
- Plan, organize and coordinate warehouse activities;
- Supervise warehouse employees and daily operations;
- Optimize resources, spaces, and warehouse activities;
- Control and manage inventories;
- Enforce all company rules and regulations;

Key features

- Fluent English;
- Preferable previous experience gained working in production companies;
- Good knowledge of the Office package;
- Reliability and precision
- Ability to work in a team and propensity for problem solving
- Degree in Management Engineering is preferred;
- SAP knowledge will be a plus.

Tau Group is a technology company at the core of energy transition, decarbonization of energy and electrification of transport. Its patented technologies reconcile the necessity of sustainable, resource-minimizing manufacturing with the power, reliability and performance that electrification requires to enable smaller, greener, longer-lasting and more powerful motors, transformers and generators. Tau focuses on carbon-conscious protective coatings for high-performance and standard copper and steel wires.
